Austro Control

Maximilian Peukert
Air Navigation Services of Sweden (LFV)

OUR RESEARCH

Aviation personnel are trained to the highest level in preparation for an unpredictable or dangerous event that may occur. These high stress events are a striking contrast to the typical daily operations.

A typical workday is filled with repetitive processes which may be monotonous for employees, but necessary to ensure passenger safety and airport efficiency.

In our research, we want to understand how you experience and cope with boredom in your active operations.
